Safe Working Load:	150 Kg
D.O.M:	2018
NEXT EXAMINATION:	After 6 Manth

The Products Have Been Inspected and Found Them Conformable to Relevant

- Isolate the winch by shutting off the air UN wind line from the drum and inspect the line visually for any kinks, broken lines & other damages.
- Remove the winch from the foundation plate or mounting brackets.
- visually check all outside parts of the winch (including the spooling device and control valves) for the proper installation and damage all wear.
- Performed NDT on winch connecting points to the mounting bracket or plate bolts clamps area etc. as per manufacturer recommendation.
- Checked the condition & details of the manufacturer name plate.
- Ensure the condition SWL is clearly marked.
- Prepare and submit the inspection report.

INSPECTION RESULT

- ** Visual & MPI was carried out on the available welding and critical areas of (Air Winch) components and found satisfactory for further use.**
- ** CAT III Inspection Was Carried Out on Air Winch and Found Accepted at The Time of Inspection.**
